DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on 08/01/2003. It is noted, however, that applicant has not filed a certified copy of the 10335325.9 application as required by 35 U.S.C. 119(b).

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 01/26/2006 was considered by the examiner.

3.

Drawings

- 4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because no drawings were included with the application other than those included in the WO 2005/012089 application. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
- 5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the control grip and the extraction device must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Art Unit: 3751

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- 6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 7. Claim 60 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 60 recites a control grip. In the context of the embodiment of the application believed to be represented by claims 54-62, it is not clear what this means.

Claim Rejections - 35 USC § 102

Page 4

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 54, 55, 61-64, 67, 103 and 109 are rejected under 35 U.S.C. 102(b) as being Koch by (US PGPub 2005/0084181) (provided by applicant).

In Res claim 54 and 103 with reference to Figures 1-6 Koch discloses a coupling closure comprising a first and second flexible band having closures on their inner sides (11) (paragraph 63). Koch further discloses third and fourth closure elements (15').

In Re claim 55 Koch discloses closed end segments (7').

In Re claim 61 Koch discloses a flexible bag.

In Re claim 62 Koch discloses adhesive.

In Re claim 63 Koch discloses a second coupling closure having a flexible bands and first, second (paragraph 63), third and fourth (2) closures.

In Re claim 64 Koch discloses closed end segments (7,7').

In Re claim 67 Koch discloses a container (10).

Koch as applied to claim 103 above performs the method of claim 109 during ordinary use and operation.

Art Unit: 3751

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

11. Claims 104 and 105 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koch.

In Re claim 104 Koch as applied to claim 103 above discloses all the limitations, but doesn't disclose an extraction device. It was old and well known in the art to provide a spoon or other extraction device inside of sealed packaging, in order to provide a user with a mechanism to remove the product. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide such an extraction device.

In Re claim 105 Koch as applied to claim 103 above discloses all the limitations, but doesn't disclose a hose. One of ordinary skill in the art at the time the invention was made would recognize that the Koch closure apparatus could be advantageously used to join two hoses, in order to provide a flow path while preventing the contents of either hose from escaping.

Double Patenting

12. Claims 54, 63 and 103 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 7,770,936. Although the conflicting claims are not identical, they are not patentably distinct from

each other because claims 54, 63 and 103 are merely more broad versions of claim 1 of the '936 Patent: Claim 1 of the '936 patent recites the limitations of a pair of coupling closures, each comprising flexible bands having locking elements on both their inner and upper sides (lines 14-25). Thus claims 54, 63 and 103 are anticipated by claim 1 of the '936 Patent

Allowable Subject Matter

13. Claims 56-59, 65, 66 and 68 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 60 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JASON K. NIESZ whose telephone number is (571)270-3920. The examiner can normally be reached on mon-fri 9-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Huson can be reached on (571) 272-4887. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
